SUMMARY

Full Stack Software Developer with 5+ years of experience designing, developing, and deploying scalable web applications across fintech, healthcare, and enterprise platforms. Proficient in Python, Django, Node.js, TypeScript, React, PostgreSQL, and cloud deployment technologies. Experienced in building secure REST APIs, responsive frontend interfaces, authentication systems, payment integrations, and high performance backend services. Proven track record of improving system performance, reducing API latency, and delivering reliable end to end solutions that support millions of transactions. Strong collaborator with experience working across product, design, DevOps, and engineering teams.

TECHNICAL SKILLS

- Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design, REST API Integration.
- Backend: Python, Django, Flask, Express Node.js, Express.js, TypeScript.
- Auth & Security: OAuth2/OpenID Connect (Google), JWT, Redis (token store), RBAC .
- Databases: PostgreSQL, MySQL, MongoDB.
- Messaging & Integrations: Firebase Cloud Messaging (FCM), Payment Gateway Integrations, REST APIs.
- Cloud & DevOps: Digital Ocean, Render, Docker, GitHub Actions, Git, GitLab.
- Data & Analytics: pandas, NumPy, scikit-learn.
- Observability: Structured logging.

WORK EXPERIENCE

Software Developer, KophyTech

Jan 2025 - Present

- Developed and maintained frontend and backend features for appointment scheduling and workforcemanagement platforms.
- Built secure REST APIs using Express.js and integrated them with frontend applications.
- Built secure REST APIs using Express.js and integrated them with frontend applications.
- Implemented Role-Based Access Control (RBAC) for multiple user roles.
- Developed booking workflows and affiliate tracking systems.
- Integrated third-party services and webhook-based automations.
- Implemented structured logging and monitoring solutions, reducing issue resolution time by approximately 35%.
- Collaborated with product and design teams to deliver user-focused features.

Full Stack Engineer, Artifiation(Remote)**Mar 2024 -Dec 2025**

- Built scalable healthcare applications using Django and modern frontend technologies.
- Developed REST APIs and integrated them with web interfaces.
- Improved API response time by 30%, supporting significant user growth.
- Optimized PostgreSQL and MySQL databases handling over 2 million monthly transactions.
- Collaborated with designers and stakeholders to deliver complete product features.
- Led and mentored four developers while maintaining code quality standards.
- Created technical documentation and trained product managers on system workflows.

Backend Developer, FedusTechnologies(Remote)**Feb 2023 - Jan 2024**

- Designed and developed fintech applications supporting digital wallets, transfers, and bill payments.
- Built customer-facing interfaces and backend microservices.
- Developed secure payment APIs processing over 50,000 daily transactions.
- Implemented authentication systems using OAuth2 and JWT.
- Improved fraud detection processes through data-driven integrations.
- Reduced reporting latency by 35% through database optimization.
- Produced API documentation and onboarding materials for integration partners.

EDUCATION

Bachelor of Engineering (CivilEngineering) Federal University, Oye-Ekiti 2024
NCE in Mathematics and Physics Kwara State College of Education 2018

PROJ ECTS &ACHIEVEMENTS

- Healthcare API Gateway: Built a scalable API gateway for healthcare applications, integrating node.js services.
- Optimized queries to support 1M+ monthly transactions, reduced API latency by 30%.
- Event-Driven Notification System: Replaced cron jobs with Firebase Cloud Messaging (FCM) to provide real-time appointment notifications for clients, interpreters, and staff.
- Reduced notification delays by 40% and improved user engagement.

SOFT SKILLS

- Technical leadership: Mentored 4 developers, guided career growth.
- Communication: Simplified backend workflowsfor product managers and trained non-technical staff on API use.
- Problem-solving: Delivered resilient solutions under tight deadlines, including handling unexpected 200%traffic spikes during client onboarding.
- Collaboration: Partnered across data science, frontend, and DevOpsteamsto deliver full stack solutions.
